

HOW FAST ARE YOU?

ONLINE POINTS SERIES (SEASON 22)

F1 VERSION

This is the **Formula One** version of HFAY! We all know that the real Formula One series is the most technical, most innovative type of hi-performance racing in the world, and our little 1/28th scale version is no different from the real thing! (except you don't have to be a billionaire to maintain your team!) And don't forget... you have your team running with you as well, so you might want to try to help them out as well. With open wheel racing, passing is going to be a big part of what makes a team fast and consistent! If a team has cars doing all kinds of different things on the track, it might prove hard to find a "groove" to stay in.

Take special note of the V.T.R.s in this manual, because they are going to be very brief! We hope to create a new kind of hi-tech racer with this series, pushing all of us to step it up a few notches when it comes to thinking about what makes a race car a top level performance machine just like our full scale counterparts ! For those of you that have raced the F1's they always seem to best the racer times, without feeling like you're actually going faster.

Setup for all of these F1 events is in-line with all of our regular racer series events, so it will be easier for more clubs to participate. You'll notice in this manual that there are many parallels with the racer manual, pre-requisites, point system, data gathering are all the same. But please try to take note of what is actually different and try to utilize it all to your full advantage!

Once again, we'll try to keep this as simple, and as fun as possible for all. This manual will walk you through, step by step, showing you how to produce real results for your club. If you have any questions on anything within the following manual, please do not hesitate to contact one of the HFAY Judges on our website:

<http://mini-zracer.com/forums/showthread.php?t=36591>

If you desire participate in HFAY events, shoot us an email, and we will be more than happy to walk you through our requirements for setting you up to become an approved HFAY racing station!

HOW FAST ARE YOU?

ONLINE POINTS SERIES (SEASON 22)

F1 VERSION

GETTING STARTED

First off, there are pre-requisites for competing in this event. Here are the first steps.

1. All clubs must have a minimum of 2 Wide "L" RCP tracks. RCP tracks can be purchased from many different venues, check our links page on our website for further information on where to purchase tracks and timing systems.
2. You must be using approved chassis' and bodies (see V.T.R.s on pg. 4).
3. Participating clubs must have some form of lap timing/counting system. Compatible lap counting systems are as follows:

Core Analog KOPropo AMBit LapDragon TeamOrion GiroZ. I-Lap

Really, any system that can conform to the timing configurations set forth for each layout. The timing configuration is on the point series webpage, shown in Core format.

4. You must be able to complete each event layout, as shown on our website, and must submit the results within the designated time frame. NO EXCUSES! If times are not submitted within the designated time frame, your club will not receive any points for that particular event. (See page 4, rule #3 for timeframe details)
5. You must setup the track exactly as shown on the point series page, this includes bump out tiles as well!
6. Each driver must have a designated "name" or "handle" throughout the entire event, when results are turned in, they must be in a basic text format, here's an example:

Racer, Laps, Time, Club name, Motor, Class (see below for examples)

```
RCGuru,92,8:00.34,Club Name,F1,HFAY Spec
Havok,92,8:04.09,Club Name,F1,HFAY Spec
Superdude,90,8:02.64,Club Name, F1,HFAY Spec
MiniZManiac,88,8:02.44,Club Name, F1,HFAY Spec
```

Please name the text file in an easy to understand format as well, we want to be sure we get the right results in the right event! An example would be: Club name, OLPS Race 5, F1 Class Results

F1 VERSION

GETTING STARTED cont'd

7. Cheating will not be tolerated in any way, shape, or form! It is the judge's responsibility to make sure this does not happen! If a judge finds a club member cheating, he must pull that driver from the series. As true competitors, you are all expected to put forth your best honest effort. The HFAY Judge has the final say in all matters for his club's participation.

8. Each participating club must have at least a minimum of 3 drivers for each Main. Filler drivers are allowed to maintain the minimum amount of drivers for the Mains at the Judge's discretion. (Filler driver's data will not be counted but must be recorded)

9. Each track may be practiced as much or as little as the club would like. Heats and qualifying may be done in the format that the individual club deems necessary to complete. Although, drivers who bump up into another HFAY Main must fully disregard their previous results, even if the previous results were better!

10. Once the races have been completed they may not be re-run to improve results. Re-runs of races will be due to lap counter failure resulting in un-usable data only. Races cannot be stopped due to mechanical failure of vehicle(s). So make sure your vehicle is ready to run the full race! Collisions can and do cause breakage, but that's all part of racing! So be courteous and careful out there!

11. You must finish each race with the car you started with (same chassis, body and of course... motor) it is permissible to repair parts of your car to get back into a race, but you may not swap cars entirely.

12. First race of each layout is to be run Clockwise. Second race of each layout is to be run Counter Clockwise.

13. Race "Mains" are to be 8 minutes long, and Set to a standard start, meaning that the clock starts when the horn sounds. (note: IFMAR or Staggered starts are not allowed.)

14. The timing loop must be centered under the full width checkerboard starting line.

15. Starting position will be determined by the club's preference, obviously you will be lining up behind the loop's location. Space the cars as necessary. Jumping the start must be avoided at all costs. If a driver jumps the start signal, the race will be waived off and the grid reset as per club's preference.

16. Actual race data can be released by each club only after that data is posted on the HFAY website. It is not required to post the actual race data, but it is highly recommended.

ONLINE POINTS SERIES (SEASON 22)

F1 VERSION

Point Series Format

1. Points will be awarded to each individual racer based on overall finishing position. This will be achieved by ranking all data received by all of the participating clubs. Finishing position will be determined by amount of laps completed, and the time to complete them.
2. Each racer will have 2 point drops to use for either missed races or eliminating their lowest point finish for a race. All racers will have their 2 lowest finishes automatically eliminated from their final points tally at the end of the season.
3. Club results must be uploaded to the How Fast Are You website by 10:00am (MST) on the 3rd day of the following month to be considered on time. Late entries will not be scored. You can run your events ahead of time if you like, but please turn in the results as soon as possible. (we will hold them until release date) As long as we get the data for that months event before the end of that months due date.
4. Scoring data from each club will be kept secret until all participating club results have been collected. Only then will the monthly results be posted on the forums. This prevents clubs that have not run yet from unfairly seeing the results they must beat.
5. Results will be posted on the HFAY website by the 3rd. of the following month.
6. Points will be awarded by using a very simple point scale, only a first place finish gives a 1 point boost, the new scale allows for 199 drivers to receive points for an event (See below). These points will be awarded for each race, each month. The overall results (laps completed and times), along with the Overall Standings will be posted on the MZR forums.

FINISH	POINTS	FINISH	POINTS
1 ST	200	9 TH	191
2 ND	198	10 TH	190
3 RD	197	11 TH	189
4 TH	196	12 TH	188
5 TH	195	13 TH	187
6 TH	194	14 TH	186
7 TH	193	15 TH	185
8 TH	192	Ect.	Ect.

ONLINE POINTS SERIES (SEASON 22)

F1 VERSION

Vehicle Tech Regulations

Electronics: Any type of ESC. This includes the ASF 2.4ghz and FHS 2.4ghz and the AD Band ESCs. FET modifications and capacitors are allowed. PN Spektrum DSM2 ESC is allowed. The Brushless Mini-Z or VE boards are not allowed.

Chassis: Kyosho Mini-Z F1 type chassis only.

Body: Kyosho F1 type bodies only, must be fully installed, wings and all! Some material may be removed for operation of suspension items. Judges reserve the right to disqualify a body for excessive material removal.

HFAY Spec Motor: HFAY Spec Motors, or RTR Stock Motors, PN 70 Turn Motors
They are great motors at a great price.

Batteries: NiMH Rechargeable batteries only!

Transmitter: Any brand

Frequency: Any type.

Alloy: Any aftermarket alloy parts are allowed.

Bearings: Any brand.

Tires: Original Kyosho or aftermarket type F1 tires only. No foam tires allowed. No traction compounds allowed on tire, or race surface. Tire warmers are allowed.

Wheels: Original Kyosho or aftermarket type F1 wheels only. Aftermarket plastic, delrin, and alloy wheels are permitted.

Suspension: Any aftermarket or custom "homebuilt" suspensions are allowed, as long as they operate in a "stock" manner.

Hop-ups: Hop-ups may include any of the following: wheels, motor mounts, knuckles, tie rods, ball diffs, front/rear springs, suspension plates, etc. (basically hop-ups are limited to any suspension and handling upgrades, motor mounts and battery clips.)

Not much left to tech really, but please try to stay true to what we do here at HFAY! As always, tech inspections are at the Judge's discretion at any time before, during or after the event. Remember, these events are based on honesty! If you are cheating, you will have to live with the knowledge that you could not cut it like everyone else! Besides, this is only for fun anyways.

HOW FAST ARE YOU?

ONLINE POINTS SERIES (SEASON 22)

F1 VERSION

Driver's Championship (For bragging rights)

1. When all 10 races (five events) have been completed, the driver with the most accumulated points will be named "DRIVER'S CHAMPION".
2. When all 10 races (five events) have been completed, the driver with the second most accumulated points will be named "FIRST RUNNER UP".
3. When all 10 races (five events) have been completed, the driver with the third most accumulated points will be named "SECOND RUNNER UP".

Team (Club) Championship (For bragging rights)

1. When all 10 races (five events) have been completed, the "F1 TEAM CHAMPIONS" will be named.
2. The Team Championship is scored by combining the total points scored by each driver of that club, and then dividing it by the total number of said club's driver attendances for the season to create an average for that team. Clubs will be disqualified from the Team Championship if the entire club misses more than 2 races (one event). At the end of the season, the club with the greater average will be named "F1 Team Champions".
3. Points ties are broken in favor of the tied club with the most wins. If still tied, the Championship goes to one of the tied clubs with the highest finish in the last race.

16 & Under Driver's Championship (Yep... you guys get to brag too!)

When all 10 races (five events) have been completed, the 16 and under driver with the most accumulated points will be named "ROOKIE F1 DRIVER'S CHAMPION". Must be 16 years of age or under at the start of the season (July 1st) to qualify.

And that's basically all there is to it!

Good luck to all!

HFAY Management
